| Module Code | w.BA.XX.2EuA.XX | | | | | |
| Module Description Program and Specialization | The primary objective of this module is to provide students with a comprehensive understanding of the dynamics and processes within the European Union, including its policies and Swiss-EU relations. The module delves into contemporary developments such as the European digital single market, EU regulations on artificial intelligence, and the European Green Deal. In addition to exploring these recent topics, the module takes an interdisciplinary approach to examine the evolution of European integration. Students engage in small group discussions on current issues of their choice, allowing for active participation and deeper exploration of the subject matter. Moreover, they are required to complete an online test during the final week of the semester. By undertaking this module, students will be well-prepared for pursuing careers in European contexts, public affairs, or businesses that are directly impacted by regulations originating from Brussels. § Business Administration - Specialization in Accounting, Controlling, Auditing § Business Administration - Specialization in Banking and Finance (FLEX) § Business Administration - Specialization in Banking and Finance (PiE) § Business Administration - Specialization in Behavioral Design § Business Administration - Specialization in Behavioral Design § Business Administration - Specialization in General Management § Business Administration - Specialization in General Management (Flex) § Business Administration - Specialization in General Management (Flex) § Business Administration - Specialization in Risk and Insurance § International Management | | | | | |
