

Valid for 2023.FS

Module Name: Business Law			
Module Code	w.BA.XX.2WR.XX		
Module Description	The Business Law module gives students an overview of the system and the key concepts of private law, especially issues of contract law. Students learn to categorize and apply related legal questions and issues accurately. They get to know the most important norms and principles of Swiss obligations and contract law. In particular, they explore the key provisions in the Swiss Civil Code and the Swiss Code of Obligations with regard to the formation and performance of contracts in a legal context. The module enables students to apply this knowledge methodically and correctly to practical cases. Working on and resolving cases is a key component of this module. In addition to learning about the theory, students will also do case-related exercises involving the content of this module. Practical relevance is of particular importance to enable students to make practical use of the material in their everyday (professional) life, such as in dealing with sales and employment contracts. In addition to knowledge of the general formation and performance of contracts, students receive an overview of important types of contracts under special contract law as well as sales law, contract for work and services law, contract law, labor law, and means of security.
