

Valid for 2023.HS

Module Name: Critical Thinking	
Module Code	w.MA.XX.CTH.23HS
Module Description	The transition from a linear and conventional business model to a circular one will be prone to initial failures, and it therefore inherently involves risk-taking. To embrace change, a critical mind-set is needed, in which every stakeholder along the value chain is able to deal with uncertainties and accept failures while being able to make decisions in keeping with their values and convictions. This module will enable students to hone their critical self-reflection skills and to challenge social and business conventions. This process will require empathy and emotional intelligence in addition to a wide range of cognitive competencies because an integral part of critical thinking goes beyond analytical skills and rational decision-making models. This module will also address the personal level in order to help students deal with inherent biases, ingrained patterns of thinking, values, and listening capabilities. Against this background, critical thinking will be applied towards the challenges of moving stakeholders from a linear to a circular mindset, and students will apply their skills in group projects to develop practical, hands-on solutions.
Program and Specialization	Circular Economy Management
Legal Framework	Academic Regulations MSc in Circular Economy Management dated 02.06.2022, Appendix to the Academic Regulations for the degree program in Circular Economy Management, first adopted on 23.09.2022
Module Category	Module Type: Compulsory
ECTS	3
Organizational Unit	W International Management Institute
Module Coordinator	Thorsten Busch (buth)
Deputy Module Coordinator	Adrian Burri (burd)
Prerequisite Knowledge	Analysis and decision-making principles and models; ethics in organizational behavior
Contribution to Program Learning Goals (Affected by Module)	<ul style="list-style-type: none"> § Professional Competence § Methodological Competence § Social Competence § Self-Competence
Contribution to Program Learning Objectives	<ul style="list-style-type: none"> Professional Competence § Knowing and Understanding Content of Theoretical and Practical Relevance § Apply, Analyze, and Synthesize Content of Theoretical and Practical Relevance § Evaluate Content of Theoretical and Practical Relevance Methodological Competence § Problem-Solving & Critical Thinking § Scientific Methodology § Work Methods, Techniques, and Procedures § Information Literacy § Creativity & Innovation Social Competence § Written Communication § Oral Communication § Teamwork & Conflict Management § Intercultural Insight & Ability to Change Perspective Self-Competence § Self-Management & Self-Reflection § Ethical & Social Responsibility § Learning & Change
Module Learning Objectives	<p>Students...</p> <ul style="list-style-type: none"> § will be able to use and assess information critically. § will be enabled to make convincing arguments and critically assess fallacies when arguing a case. § will learn to recognize emotional, social, and cognitive biases. § will be able to reflect critically on their social and professional roles. § will make better decisions that consider a wide range of critical factors. § will use design thinking principles to develop critical and innovative products/processes.

Module Content	§ Critical examination of the elements of thought § Analysis and decision-making models linking the objectives and principles of the circular economy to recommendations for organizations § Dealing with uncertainties and the fear of failure § Dealing with personal biases, habits, and values § Psychological barriers and roadblocks to the implementation of a circular economy § Design thinking and open innovation principles § Development of case-study based solutions
